Kenzen Wellness

The Nikken Nutrition Philosophy

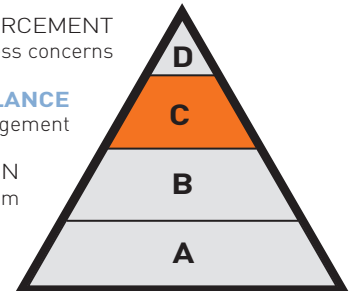

Hippocrates, the father of medical science, said, "Let food be your medicine." Nikken Kenzen Wellness nutrition is based on the principle that natural, whole foods are the ideal source of the nutrients your body was designed to consume. They are "living foods" in the sense that healthy, natural nutrition supports normal physical function, contributes fuel for energy, and helps the body defend itself against illness, aging and environmental challenge.

THE FACTS

- Fad diets and temporary fixes are not the way to maintain a healthy lifestyle. A US government review found that two-thirds of American dieters regained all the weight they had lost within a year, and 97% had gained it all back within five years. Cleanse offers a means of getting a fast start on a weight management program that can become a permanent lifestyle change.*
- Any effective weight management regimen depends on efficiently processing nutrient intake and eliminating waste or excess calories. Kenzen Cleanse helps initiate this process, by assisting in the release of built-up material at the beginning of a weight management program.*
- Regular elimination is essential as a means of removing toxins. Infrequent or irregular elimination allows toxic material to remain in the body. Cleanse helps the body to establish its own, natural cleansing cycle.*
- The liver acts to detoxify ingested material. It processes the blood coming from the small intestine containing absorbed nutrients, and purifies this blood before it travels to the rest of the body. Cleanse contains ingredients that support the liver's function in nutrient detoxifying.*
- Weight management depends on effective fat metabolism. A sluggish colon is often dehydrated, and the body will not lose fat while in a dehydrated condition. Proper hydration and normal colon function work together to facilitate the loss of fat.*
- Proper hydration also affects liver function in the fat metabolism process. Approximately 22 ounces of water are required for the liver to metabolize one ounce of fat, and if there is insufficient water available, the liver will metabolize muscle tissue instead. Supporting the elimination cycle helps the liver and other organs perform their normal activities.*
- Kenzen Cleanse contains only natural, whole-food ingredients. There are no harsh chemical laxatives in Cleanse — it is a natural herbal mixture, to assist in cleansing the natural way. These ingredients are also selected for their bioavailability, the degree they are readily absorbed.*
- The capsule formulation provides the ingredients in a form that makes use simple and convenient, with improved freshness and shelf life compared to powders or mixtures.

QUICK SHARING TIPS

- The human digestive system may contain 10 to 20 pounds or more of waste at any one time. This can contribute to a feeling of fatigue, bloat, fullness and more. People who experience colon cleansing often report they not only feel better immediately, but say that the bloat, the extra weight and distended abdomen are suddenly absent after the process. What better way to begin a weight management program?
