NIKKEN JADE GREENZYMES FEATURES AND BENEFITS:

- **Young barley grass** At its freshest and most alive with concentrated nutrients.
- **Only the highest-quality, organic materials** All natural, no preservatives, fillers or additives.
- **Only the juice is used, no pulp** Juice has the highest concentration of vitamins and minerals.
- **Prepared using a cold process** No heat, which can destroy enzymes.
- **Produced using PiMag™ water** The "water of life."
- **Nikken proprietary blend** Galactomannan, kombu extract, pearl barley seed extract, and enzymes.
- **Available in powder or capsules** For adding to meals, beverages, or take it any time.
- **Detoxifying** For circulatory and colon health.*
- **Supports skin elasticity.** To help prevent the signs of aging.*
- **Natural pH regulation** To influence the body's acid/alkaline stability.*

THE FACTS

- Barley grass juice has been described as a complete salad in a glass. Jade GreenZymes is more. It's core nutrition — a balanced combination of vitamins, minerals, enzymes and other ingredients.
- Of all barley grass products, only Jade GreenZymes is produced using PiMag™ water and the Nikken Proprietary Blend.
- The ingredients in Jade GreenZymes complement PiMag water and the preparation perfectly integrates these components. The coral calcium found in PiMag water also has natural alkalinity, in harmony with the elements in Jade GreenZymes.
- Jade GreenZymes begins in an isolated, untouched region in southern Japan. The young barley grass is grown near the sea and close to snow-covered mountains. The land is refreshed by pure rainwater.
- This all-natural, healthy organic material is carefully harvested, using traditional methods. The result is the principal ingredient in Jade GreenZymes.
- Enzymes are necessary to a number of body functions. Enzymes oxidize fatty acids. They improve digestion. Enzymes aid in ridding the body of waste, in breaking down substances for easy absorption, and in maintaining healthy bones and tissues. Jade GreenZymes is carefully cold-processed to retain the natural enzymes.*
- Jade GreenZymes can be consumed by anyone — even young children — at any time.
- In powder form, Jade GreenZymes can be mixed with any cold beverage or food. The convenient, all-vegetable capsules also deliver a concentrated serving of these nutrients.
- Jade GreenZymes is the inspiration of a Japanese medical scientist, Dr. Yoshihide Hagiwara. Dr. Hagiwara devoted his life's work to finding a natural substance that would promote health — with ingredients that support the body's nutritional needs.
