

- *Proprietary formula with cetyl myristoleate*
- *Promotes joint and tissue health**
- *Helps lubricate joints**
- *Supports joint mobility**
- *Maximum concentration of CM available*
- *Includes glucosamine and methyl sulfonyl*
- *Easy to swallow softgel*

Kenzen Wellness

The Nikken Nutrition Philosophy

Hippocrates, the father of medical science, said, "Let food be your medicine." Nikken Kenzen Wellness nutrition is based on the principle that natural, whole foods are the ideal source of the nutrients your body was designed to consume. They are "living foods" in the sense that healthy, natural nutrition supports normal physical function, contributes fuel for energy, and helps the body defend itself against illness, aging and environmental challenge.

KENZEN™ REINFORCEMENT

Targeted for specific wellness concerns

KENZEN™ BODY BALANCE

Designed to support fitness, weight management

KENZEN™ DAILY NUTRITION

A comprehensive nutritional program

KENZEN™ BASICS

The foundation of your nutrition regimen

JOINT FEATURES AND BENEFITS:

- **High Potency CM Complex** Helps support normal, healthy joint function.*
- **Includes glucosamine hydrochloride** A collagen precursor, for additional joint support.*
- **Methyl sulfonylmethane.** Supports collagen and connective tissue formation.*
- **Proprietary formula** Highest available percentage of cetyl myristoleate, plus other ingredients for joint health.*
- **Superior bioavailability** Naturally-sourced compounds.*
- **Softgels** Easy to take, rapid absorption.

KENZEN™ JOINT

QUICK REFERENCE SHEET

THE FACTS

- High Potency CM Complex is an advanced formula that nutritionally supports collagen, bone and connective tissue repair.* This proprietary formula also has the maximum concentration of CM (30%) available, and offers glucosamine and methyl sulfonylmethane.
- Based on clinical findings, cetyl myristoleate is believed to act as an anti-inflammatory for joints. It also possesses natural surfactant and lubricant properties, in support of smooth joint movement.*
- Cetyl myristoleate is a completely natural compound present in certain animals. The CM in Kenzen Joint is a highly purified, refined formula produced from this source material.
- Use of cetyl myristoleate has been studied at the U.S. National Institutes for Health for decades. Clinical trials concluded that there are no harmful or side effects in use of this compound.
- Glucosamine is a component of cartilage. In the body, it serves to support cartilaginous tissue and helps to stimulate its production.*
- Methyl sulfonylmethane is necessary for the formation of collagen. It supports joints and connective tissue by providing the biochemicals necessary for proper function.*

Recommended Use: Three (3) to six (6) total softgels per day, as needed.

NOTE: Take minimum dosage (3 per day) for maintenance, and maximum dosage (6 per day) for acute conditions.

PRODUCT INFORMATION

ITEM CODE	DESCRIPTION	SUGGESTED RETAIL
#1514	Kenzen™ Joint – US	US \$44
AVAILABILITY		
US: YES CN: YES		
FEATURED NIKKEN TECHNOLOGY		
Bio-Directed™ Nutri-Technology™		
HOW TO USE		
Take three to six softgels per day as needed — minimum dosage for maintenance and maximum dosage for acute conditions.		

Contains crustacean shellfish (shrimp and crab) and fish oil.

QUICK SHARING TIPS

Flexibility and joint movement is essential for good health as well as comfort. For increased mobility, skeletal joints need effective nutritional support for maintenance and to encourage injury repair.*
