

- *Helps ease tension, relieve stress*
- *Combines massage and magnetic field*
- *Can help ease muscular aches*
- *Non-invasive, drug-free relief*
- *Pocket size, goes anywhere*

**Magboy construction**

- 1** Message nodules
- 2** Internal magnets
- 3** High-impact comfort shell
- 4** Compact case

**MAGBOY FEATURES/BENEFITS:**

- **Message nodules** . . . . . Provide a relaxing, stimulating massage sensation.
- **Magnetic technology** . . . . . Similar to the Earth's natural environment.
- **High-impact components** . . . . . Designed for long life.
- **Compact size** . . . . . Can be carried anywhere, applied to any part of body.
- **Carrying case** . . . . . Allows rotation of Magboy spheres for a rolling massage.

**THE FACTS**

- Stress can produce a pronounced effect on muscles and tendons. The aches and stiffness can impair mobility, influence other aspects of life and generate overall discomfort and fatigue.
- Massage is known to provide relief for sore muscles, tension, discomfort and stress. Massage applied to localized areas can be effective in reducing these symptoms.
- The Nikken Magboy spheres are designed to roll easily and soothe tired, tense muscles. Small and lightweight, they can be applied wherever a massage will be beneficial.
- The surface nodules add an extra level of stimulation. The Magboy's internal magnets simulate the Earth's natural magnetic field that has protected human health for millennia.
- The compact case has a dual use. It securely holds and protects the Magboy spheres and makes them easy to carry anywhere. The spheres are placed on an axis that allows them to rotate when the case is held and moved against the body for massage.

**QUICK SHARING TIP**

Offer an invitation for a massage with the Magboy, explaining that it can ease sore muscles and impart a feeling of relaxation. Rolling the Magboy spheres between the palms is an especially effective way of demonstrating this sensation.

CAUTION: If you use an electronic medical device such as a pacemaker, or have a magnetically sensitive surgical implant, do not use or wear magnetic products. Women in the first trimester of pregnancy, or anyone who has a health problem should first consult a physician before using magnetic products. Do not place magnetic products in direct contact with magnetically sensitive items such as watches, audio/video tapes, credit cards, portable electronic equipment, etc.
