

AIR WELLNESS™ POWER5 PRO™

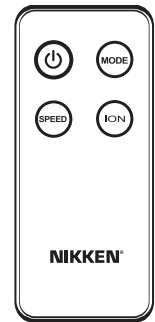

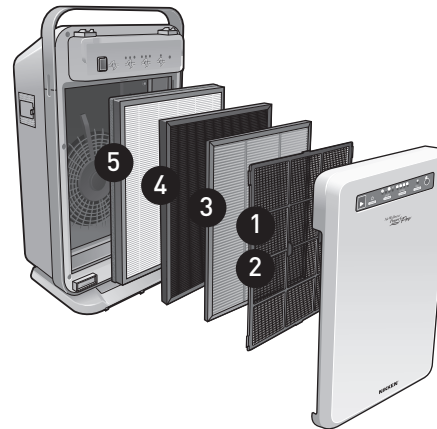

QUICK REFERENCE SHEET

- *The only system with these combined technologies*
- *Advanced, professional-quality filtration*
- *Negative-ion generator*
- *Ozone-free operation*
- *Environmentally friendly*
- *Compact design*
- *Automated operation or remote control*

Air Wellness Power5 Pro

- 1 2** Prefilter/mesh filter
Traps larger particles, helps prevent final filter clogs
- 3** Neutralizing filter
Collects and destroys microscopic contaminants
- 4** Activated carbon filter
Uses surface adsorption technology
- 5** HEPA filter
Final stage, traps remaining particles – up to 99.97% efficiency

remote control

POWER5 PRO FEATURES/BENEFITS:

- **Hospital-quality air filtration.** Reduces or removes multiple forms of pollution, for the cleanest indoor air you will ever experience.
- **Negative-ion generator** Produces negative ions, like those in the air of forests and near waterfalls.
- **Ozone-free operation.** Patented technology that does not produce ozone, a toxic gas.
- **Low noise level** Even at its highest speed, it is as quiet as a library.
- **“Green” technology** Uses natural materials for neutralizing contaminants instead of synthetic chemicals.
- **Energy Star certified.** High efficiency, reduced power consumption.
- **Filter pack** Reusable prefilter/mesh filter, with replaceable third-, fourth- and fifth-stage filters.
- **Silent and dust modes** Selectable for quiet running and for clearing indoor air rapidly.
- **Particle sensor** Detects ambient pollution level automatically, to begin operation in automatic mode.
- **Air quality display** Indicates room air quality at all times.
- **Lightweight design** Can be moved easily for portability and housecleaning.
- **Remote control** A multifunction remote allows the Power5 Pro to be turned on or off, or the timer to be set.

AIR WELLNESS™ POWER5 PRO™

QUICK REFERENCE SHEET

THE FACTS

- We are indoors 90 percent of the time. More than 65 percent of that time is spent at home. This can mean exposure to very high levels of indoor air pollution.
- Daily exposure to can be from two to five times higher — sometimes as much as 100 times higher — than outdoor pollutants.
- Carpeting, furniture, paint, cleaning agents, building materials, paneling and glues can emit chemical vapors. Dust, pet dander, pollen and odors are typically in household air. Mold, mildew, and dust mites may be present. Even gases such as radon and carbon monoxide are found in measurable quantities in many homes.
- The Nikken Power5 Pro features many technologies that are inspired by natural forces, to re-create the systems in nature that help to provide clean, fresh, invigorating air. Its neutralizing filter contains organic material that disrupts the irritant properties of these particles, without the use of synthetic chemicals.
- The Power5 Pro operates without producing ozone. Ozone is classified by the United States Environmental Protection Agency as a toxic gas, yet other air filtration systems produce it as a byproduct. The State of California has already banned the sale of ozone-producing air systems, and other states are expected to follow.
- The final stage of filtration uses a HEPA filter. These were first developed for use with nuclear reactors. They are now used in medical operating rooms, in high-tech industries and other applications where clean, pure air is critically important. The Nikken Clean HEPA System filters at 99.97% efficiency.
- The Power5 Pro features a patented system for producing negative ions. In Japan, a walk through a forest or by a mountain stream (where high amounts of negative ions are present) is regarded as therapy for mental stress, which the Japanese call *shinrin-yoku*, "forest-air breathing."
- This advanced design uses minimal energy. The Power5 Pro has been awarded the Energy Star designation from the United States Environmental Protection Agency. The Energy Star is given only to a room air cleaner that is at least 35% more efficient than a standard model, and saves its owner a minimum of 215 kilowatt-hours per year.

PRODUCT INFORMATION

ITEM CODE	DESCRIPTION	SUGGESTED US/CN RETAIL
#1438	Air Wellness™ Power5 Pro™	\$749
#1439	Air Wellness™ Power5 Pro™ Filter Replacement Pack	\$124
AVAILABILITY		
US: YES CN: YES		
FEATURED NIKKEN TECHNOLOGY		
Five-stage filtration, patented ozone-free clean ion generation, HEPA filtration, automatic control, energy-efficient technology, remote control		
COVERAGE		
387 sq ft/36 m ²		
POWER CONSUMPTION (WATTS)		
5 (Silent mode), 6, 9, 14, 20, 43 (Turbo mode)		
DIMENSIONS		
13.4 x 23.2 x 9 in/34 x 59 x 23 cm		
WEIGHT		
15 lb/6.8 kg		
MATERIALS CONTAINED IN PRODUCT		
Polyurethane, polypropylene, activated carbon, microfiber, ABS plastic		
HOW TO USE		
The Power5 may be set to operate on automatic mode or switched on at will. It features a remote control for convenience.		
FILTER REPLACEMENT		
Clean the reusable prefilter/mesh filter and replace the other filters every six months.		
WARRANTY INFORMATION		
Three-year limited warranty on fan motor assembly, one year on support components		

QUICK SHARING TIPS

- Food, water, and sleep are all important, but air is the most immediate need. It's something we use several times a minute! What could be more worthwhile than improving our air quality?
- On average, the groups who spend the most time at home are children and the elderly. Good indoor air quality is even more essential for them.
