

## QUICK REFERENCE SHEET

- *Ionic Comfort Technology*
- *Far-Infrared Technology*
- *Contoured, orthopedic design*
- *Support and warmth for five key areas*

### KenkoTherm Wrap

- 1 Stretchable, firm support is provided by the wrap material.
- 2 Far-Infrared Technology reflects energy to provide gentle warmth.
- 3 Ionic Comfort Technology releases negative ions.

### KenkoTherm Wrap features and benefits:

- *Orthopedically designed wraps* . . . . . Contoured to fit each part of the body, for a near-custom fit.
- *Strong, flexible material* . . . . . Provides a combination of comfort and support for aching joints and muscles.
- *Stretchable base* . . . . . Allows freedom of movement for exercising.
- *Breathable covering* . . . . . Allows excess heat to escape.
- *Far-Infrared Technology* . . . . . Ceramic-reflective fibers reflect energy in the far-infrared range, for breathable warmth.
- *Ionic Comfort Technology* . . . . . Negative ions — like those found in forest air — are released into the air to surround the area supported by the wrap.
- *Secure, adjustable closures* . . . . . Provides a snug fit without gaps or binding.
- *Hand washable* . . . . . For a combination of durability and long life.
- *Available in a range of sizes* . . . . . For the best fit and support.

## QUICK REFERENCE SHEET

### The facts

- Ionic Comfort Technology is a Nikken innovation. Walking through a forest or beside a waterfall is relaxing because the air in these places contains high amounts of negative ions (charged molecules). Negative-ion products that create this effect are widely used in Japan. Nikken applied the idea to the KenkoTherm Support Wraps, the only wraps with Ionic Comfort Technology.
- Actual thermographic photographs of Nikken support wraps show how Far-Infrared Technology works. Far-Infrared Technology helps provide an even, overall warmth. When you move or exercise, the energy expended is absorbed by the far-infrared fibers and reflected back in the far-infrared range, for increased comfort.
- Each KenkoTherm Support Wrap is designed to conform to a specific area of the body — ankle, back, elbow, knee, wrist — because no two of these areas are shaped alike. The orthopedic, contoured design provides the right combination of support and flexibility that each area needs.

#### AVAILABILITY

US: YES CN: YES

#### FEATURED NIKKEN TECHNOLOGY

Nikken Far-Infrared Technology, Nikken Ionic Comfort Technology

#### WEIGHT

0.10 - 0.30 lbs.

#### MATERIALS CONTAINED IN PRODUCT

Polyester fiber, cotton fiber, acrylic, polyurethane

#### CLEANING INSTRUCTIONS

Hand wash in warm water and mild detergent. Rinse thoroughly and air dry.

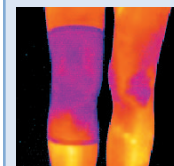

#### WARRANTY INFORMATION

6-month limited warranty

### Quick Sharing Tip

Show the thermographic photographs of a person before and after wearing a Nikken wrap with Far-Infrared Technology. The pictures offer visible proof that this technology works to warm aching muscles and joints!

When people try on a KenkoTherm Support wrap, they can feel the support instantly. After several minutes, they will also feel the warmth provided by Nikken Far-Infrared Technology.
