KENZEN™ MEGA DAILY 4™ FOR WOMEN

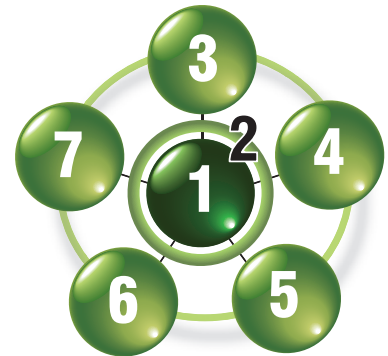

QUICK REFERENCE SHEET

THE FACTS

- Much of the modern diet consists of foods with questionable nutritional value. Many individuals are not able regularly to eat in a way that would provide the recommended amounts of vitamins, minerals and other nutrients considered necessary for maintaining good health.
- A number of experts say that for all adults, taking a multivitamin supplement is the best means of ensuring that nutritional requirements are met.
- Kenzen Mega Daily 4 for Women features a combination of vitamins and minerals recommended by nutritionists for daily consumption. It includes ingredients prepared from organic vegetables — which offer nutrients that chemically synthesized vitamins often lack.
- Mega Daily 4 for Women offers all known types of water-soluble and fat-soluble antioxidants, as well as nutrients for supporting cellular function — to support healthy metabolism, immune and brain function, hormonal balance and more. This is an exceptional range of antioxidants and nutrients.*
- This is the only formulation on the market that also features organically-grown vegetable extracts. It includes every type of vegetable phytonutrient, including flavonoids, glucosinolates, beta glucans, triterpenes, saponins and carotenoids. Derived from the whole spectrum of vegetable classes — red, orange, yellow, tan and green — this range of phytonutrients helps support healthy function of all the body's biological processes and systems.*
- A specialized blend of traditional herbs such as green tea, dong quai and grape seed extract is included to moderate the common effects of premenstrual syndrome, menopause and other female concerns.*
- The 4 in Mega Daily 4 refers to four features: a multivitamin and mineral; vegetable superfoods (which are selected for their exceptional nutrient content); whole body renewal components; gender-specific support.
- The source material for Kenzen Mega Daily 4 is a variety of foods that are organically grown in regions where the soils are not depleted by decades of commercial farming. This helps to ensure that more of the natural, whole-food nutrients are present.
- Because the Mega Daily 4 is produced using these organic ingredients, its formulation also corresponds more closely to the requirements of the human body, than is the case with conventional vitamin supplements.
- In tablet form, Mega Daily 4 for Women is absorbed over time, to allow the body to assimilate more of the nutrients instead of eliminating them.*

Recommended Use:
Take four (4) tablets daily.
